PERSONAL STATEMENT

Web Developer Industrial Engineering graduate. Excited to continue my programming journey with a team in a professional environment - currently seeking front-end roles that will allow me to continue growth and progressively work towards the back-end. My goal is to eventually start my own company and the projects that I feel passionate about. I've lived in Santiago, Chile, for 10 years and am adaptable to different personalities and cultures. I'm genuinely interested in people and will always be looking to understand the bigger picture.
